

VISION MICRO TECHNOLOGY

Triplex 8-Channel DVR Controller IP Core *for ALTERA FPGA(EPIC Series)*

Vision Micro Technology has focused herself towards a high-technology scope that brings company value through the state-of-the-art digital security system solution. We have also been targeted to meet our customer needs for flexibility.

Our Solution provides 8-channel and multi-user network digital surveillance system solutions supporting triplex functionality. With streamline access to the latest technology, we paved the way with the broadest array of building blocks, delivering cutting-edge solutions to meet and even exceed the demanding needs of security markets.

Vision Micro Technology want to be your partner with our best technology by making both high-quality and cheaper products solutions available. We have been a dynamic and fast-growing company showing ultimate professionalism in everything we do toward digital security industry. We are going to lead with our products, technology, and service, and customer relations.

❖ Major Advantages

1. Support Triplex (Simultaneous playback, record, back-up and network)
2. Support 60-field recording frame rate
3. Multi-user Network (up to 4 users)
4. Fast CD-RW (avg. 2 MB/sec) & Host USB (avg. 300 KB/sec) drive back-up
5. High-quality Audio (8/16/20 KHz) interface
